ADVERTISEMENT.

THE charitable Objects of the ROYAL METROPOLITAN INFIRMARY for the Diseases of Children, founded, April, 1820, under the Patronage of His Most Gracious Majesty, and consecrated to the memory of the late Princess Charlotte of Wales, are:

First,—To admit a number of distressing cases of Diseases of Children under twelve years of age, in an appropriate building, called the Infirmary (to serve also as a Central Station) under the direction of the Committee and principal Physician and Surgeon.

Secondly,—To administer Medical and Surgical Advice, and Medicine, *gratis*, to all the Sick Children of the Poor, indiscriminately, and on a simple application, without letters of recommendation, *whether the case be one of danger or not;* at three or more STATIONS situated in different parts of the Metropolis.

Thirdly,—To encourage the practice of Vaccination.

A Physician and Surgeon, with the Secretary, attend daily for the above purposes, at each of the Stations; and having prescribed the necessary remedies upon an appropriate form, direct the Patient's friend to apply for them at one of the undermentioned Chemists, who supplies the medicines according to the prescription, at the expence of the Subscribers to the Infirmary.

Central Station.

W. WATTS, No. 478, Strand.
A. GARDEN, No. 372, Oxford Street.

Second Station.

Mr. CARTER, South Street, Manchester Square.

Third Station.

W. MONCEY, No. 11, Tothill Street. Westminster,

With a view to secure a regular, expeditious, accurate, as well as economical distribution of Medicines at the above Chemists; the Physicians and Surgeons, after due deliberation, have determined on the adoption of the present Pharmacopoea.
